PROFESSIONAL SUMMARY

Data Analyst Trainee and Power BI Developer with hands-on training at Naresh i Technologies and practical project experience in SQL, Python, Advanced Excel, and Power BI. Skilled in data cleaning, ETL, EDA, DAX, Power Query, and dashboard development. Experienced in analyzing healthcare and banking datasets to identify trends and generate actionable, data-driven insights.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, MySQL
Python Libraries & Tools: Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook, Git, GitHub
Data Visualization & BI: Power BI, DAX, Power Query, Tableau, Dashboard Development, KPI Reporting
Data Analysis: Data Cleaning, Data Transformation, ETL, Data Validation, EDA, Statistics
Spreadsheets & Reporting: Advanced Excel, KPI Design, Data Storytelling, Reports

EXPERIENCE

Data Analytics Trainee Jan 2026 – June 2026
Naresh i Technologies Hyderabad, Telangana

- Completed hands-on training in SQL, Python, Advanced Excel, and Power BI, applying data analytics techniques to practical datasets and business problems.
- Developed interactive Power BI dashboards using DAX measures and functions to monitor business KPIs and analyze performance trends.
- Applied Python, Pandas, NumPy, SQL, MySQL, and Power Query for data cleaning, data transformation, exploratory data analysis (EDA), and insight generation.

PROJECTS

Healthcare Disease Analysis | GitHub
Tech Stack: Python, SQL, MySQL, Pandas, Jupyter Notebook, Power Query, Power BI, DAX

- Analyzed 1,000+ healthcare records using SQL (MySQL), Python, and Pandas in Jupyter Notebook to identify disease trends and patient risk patterns.
- Cleaned, validated, and transformed data with Power Query and Python (ETL), resolving missing values, duplicates, and inconsistent records; performed EDA on patient demographics and health-risk factors.
- Built an interactive Power BI dashboard with DAX measures and KPI reports, using data storytelling to present trends for data-driven reporting.

Bank Loan Approval & Prediction | GitHub
Tech Stack: Python, SQL, MySQL, Pandas, NumPy, Jupyter Notebook, Power Query, Power BI, DAX

- Analyzed 1,000+ loan records to identify borrower characteristics, loan performance, repayment trends, and risk patterns.
- Cleaned, validated, and transformed data using SQL, Python, Pandas, NumPy, and Power Query (ETL); performed EDA to evaluate loan status, borrower profiles, and risk segmentation.
- Developed an interactive Power BI dashboard with DAX KPIs to monitor loan performance and present insights that support business reporting.

EDUCATION

B.Tech - Saharsa College of Engineering, Bihar | CGPA: 7.69 / 10

Intermediate (12th) - Hadi Hashmi Plus Two School, Gaya | Division: 1st

CERTIFICATIONS & ACHIEVEMENTS

- **Data Analyst –** Naresh i Technologies, Hyderabad
- **Python Certification** - Spoken Tutorial, IIT Bombay | Score: 85% | Credits: 4
- **HackerRank** - 3-Star Badge in SQL and Python
